FOREWORD

This volume contains Appendix B-2 of the SCIPS Stage I Report. This appendix gives a listing of foreign publications, by title, that were recorded during the survey as occurring in one or more of the surveyed organizations. The listing was reproduced from an unedited computer print-out of part of the SCIPS item file. As discussed in Appendix F, Volume II, of the report, the establishment of an agreed or authoritative list of foreign publications by title and a common reference number would be a good tool in coordinating processing efforts and communicating between systems. This appendix contains some 10,000 items that probably are more than half of the items that would be on a complete community list. Such a list of course, is very large and very dynamic -- thus the appeal for machine maintenance.
